

— A Paradox in Motion —

Consider this: It appears statistically impossible that *every* nation/state on Earth can look at Climate Catastrophe with the same appalling do-nothing ignorance, an ignorance no less which they've demonstrated *since the first UN climate alarms were announced back in Stockholm, 1972!*  
Yet, impossible or not, this is where things stand.

And that's only half of it.

It also seems statistically impossible that: At the many UN World Climate Alerts which have come and gone since 1972, not once has Global Academe bothered to show up and warn the World (*and the States*) *just how dangerous State denial of Climate Catastrophe is for life on Earth!* A half-century of silence by Academia globally?  
Statistically impossible?

Apparently not. For this, *exactly*, is our dilemma today!  
And not just broken promises from the States, but decades of self-righteous antagonism from the more powerful States, as if Climate Rescue is some sort of criminal enterprise!

An antagonism so intense in some nation/states that their progressive citizens fear being punished as Climate-Rescue terrorists!  
All of which means what?

*If* State and Academe denial of global climate hazard is a fact (and it *is*), then we have on our hands a brand of *pathological inaction* which spans both the governments of the World and their teaching institutions.

This inaction, which has *already begun killing us*,  
is no longer due to an ignorant populace.  
For World-scale weather events have finally awakened public consciousness.

Not one bit accidentally,  
the mutual paralysis of Academe and the State we are suffering, fulfills the societal predictions of anthropologist Pierre Clastres and a small but unique group of sociologists. But that's just the latest strand of a long-suppressed and fascinating backstory.

What needs to focus us immediately is *a coherent solution to our common hazard!* Because Climate Catastrophe is no longer coming but is *underway*, and because the clock for most life on Earth is now ticking in *negative* accumulation, *a full understanding of State- and World Academe's paralysis-to-act is imperative to our finding any solution!*
